

# Merging

WorksWell & DrawWell have the ability to use tokens representing a variety of document, printing and user defined parameters. During the printing process these tokens are replaced with the corresponding data.

Here are some examples of their use.

## Here is a short description of this document:

`.docDescription.`

## A few facts and figures about this document:

Name: `.docName.`  
Last saved at: `.docModTime.` `.docModDate.`  
Page count: `.docPageTotal.`  
Printed at: `.curTime.` `.curDate.`  
Printed on: `.printerType.`  
Produced by: `.CompanyName.`  
`.CompanyAddress.`

After a "Print Merged..." the above text looks like this:

## Here is a short description of this document:

*Sample document to demonstrate the use of merge tokens in DrawWell.*

## A few facts and figures about this document:

Name: *Merging.dwdoc*
